

Curriculum Vitae

Oscar John Nichols Haavardsholm

Office address:
Vista Analyse AS
Meltzersgate 4, 0257 Oslo

Phone: +47 41 22 70 51
E-mail: oscar.haavardsholm@vista-analyse.no

Nationality: Norwegian/English
Date of birth: October 18th 1989

PROFILE

Oscar has a master's degree in economics from the University of Oslo. He has worked in Vista Analyse since 2011. Oscar wrote his master thesis about the valuation of urban ecosystem services in cooperation with The Norwegian Institute for Nature Research. Oscar has worked on several projects in the fields welfare, transport and environment. He has extensive knowledge about economic analysis in theory and practice, and he has substantial experience in data collection from different sources as well as quantitative calculations and analysis. In several projects Oscar has been in charge of the data analysis.

EDUCATION

- 2009 – 2015** Five-year master's program in economics at the University of Oslo. This is a general program with both micro- and macroeconomics classes. The program is heavily focused on economic theory, mathematics and statistics.
- 2012 - 2013** Exchange year at the University of Washington in Seattle, USA. Taking classes in economic development, transitional economies, finance and resource economics among other classes.
- 2011** Summer school program in Chinese language and culture at Shanghai University, SILC. Part of a longer stay in China doing volunteer work through the organization AIESEC.
- 2009** Study program in Development Studies in Hoi An, Vietnam. A program that ties theory to practical experience and cultural understanding, organized by the University College of Oslo and Kulturstudier.

WORK EXPERIENCE

- 2011 - present** **Consultant**, Vista Analyse AS.
- 2011** **Conference organizer**, European Economic Association & Econometric Society hosted by the Economics Institute at the University of Oslo

- 2009 - 2012** **Student recruiter**, Kulturstudier AS.
- 2004 - 2011** **Several part-time and summer jobs**, including substitute teacher, after school program employee, waiter, warehouse worker, driver, festival crew, bicycle mechanic and construction worker.

VOLUNTEER WORK

- 2010- 2012** Student organizations at the UiO, writer and editorial staff in Observator student magazine. Coordinator in Radikalt Økonominettverk Blindern student organization.
- 2011** Volunteer English teacher in China through AIESEC Shanghai University.
- 2010 - 2012** Mentor for new students at the University of Oslo.

PROJECT WORK EXPERIENCE

The following are presentations of selected projects Oscar has worked on at Vista Analyse.

- 2017** **Environmental effect and potential of the sharing economy**
ongoing *For the Nordic Council of Ministers*
Vista Analyse will consider the environmental effect and potential of the sharing economy in the Nordic countries.
- 2017** **Analysis of business and commerce for Lillehammer**
ongoing *For the municipality of Lillehammer*
Vista Analyse will do an analysis of business and commerce for the municipality of Lillehammer.
- 2016-2017** **Assessment of wider economic impacts of road investments**
For Nye Veier
Up to date review of the state of knowledge and an assessment of the wider economic impacts of eight road investments.
- 2016-2017** **Guidance on wider economic impacts in manual V712**
For the Norwegian Public Roads Administration
Description of wider economic impacts, a checklist of what projects have potential for wider economic impacts and chapter on how to treat wider economic impacts in manual V712.
- 2016-2017** **Other societal effects Lyngdal-Sandnes**
For the Norwegian Public Roads Administration
Assessment of wider economic impacts, local and regional effects and distribution effects for different alternatives for new E39 between Lyngdal and Sandnes. Further development of method for assessing wider economic impacts.
- 2016** **Mapping of the sharing economy in Norway**
For the Ministry of Local Government and Modernisation
A mapping of the sharing economy initiatives in Norway today and an assessment of the impact of the sharing economy on the Norwegian economy today and in the future.
- 2016** **Evaluation of sustainable destinations**
For Innovation Norway
Evaluation of the sustainable destination standard.
- 2016** **Green competitiveness**
For the Ministry of Climate and Environment

Identify opportunities for Norwegian industry in light of the green transformation that is in front of us. We quantify these opportunities in a macro-economic scenario. We discuss policies and strategies to support promising opportunities, and we analyze indicators of green competitiveness.

2016 Valuing environmental effects of building electrical infrastructure in economic analyses.

*Vista-
rapport*

2016/
Vista Analyse will evaluate what environmental effects can be valued in an economic analysis, as well as develop a method for valuing these effects. The method will be applied to a relevant sample and will be simple to administer and be easily transferrable from one investment analysis to another.

Oscar has worked on the literature study as well as collecting and analyzing the data for the case study.

2015 Evaluation of serving a sentence with electronic control

*Vista-
rapport*

2016/02
Vista Analyse will conduct an evaluation of serving a sentence with electronic control. The evaluation will consider whether this scheme reaches its target group, and it will evaluate whether the scheme achieves its goals on less relapses and increased capacity, and if there is a need to make changes in order to achieve better results. There will be a cost benefit analysis, where the consequences of serving a penalty with electronic control is compared to serving it in jail.

Oscar has worked on the data analysis as well as conducting interviews.

2015 Calculating references for the InterCity lines

*Vista-
rapport*

2015/
Vista Analyse has conducted traffic calculations for a reference alternative for rail transportation on all the InterCity lines. For all the sub-stretches within the IC-area there are calculations for the effect of increased travel time for the use of valuing the economic effect of different construction alternatives.

Oscar has conducted model calculations using Vista Analyse's transport model.

2015 Updating and recalibrating the InterCity model

*Vista-
rapport*

2015/
Vista Analyses transport model for InterCity-lines was updated with the newest available data. The parameters of the model have been recalibrated on the basis of the updated data in order to do calculations on the planned construction alternatives.

Oscar has conducted model calculations using Vista Analyse's transport model.

2015 Marginal external costs from transportation on water and rail

*Vista-
rapport*

2015/
This project studies marginal external costs from goods transport on water and rail and illustrates with calculations for transport between Oslo – Trondheim and Oslo - continent.

Oscar has contributed with geographical analysis.

2015 Developments and trends in the sale of new cars and taxes on cars

- Vista-
rapport
2015/14 *For Finansdepartementet*
Vista Analyse has analyzed the historical development in the sale of new cars and made different reference alternatives of expected development and composition. The reference alternatives allow for calculations of eventual future tax changes. Differences in things like CO2 emissions, fuel composition, taxes and revenue have been studied.
Oscar was in charge of the data analysis.
- 2015 Community and business development in the Moss region**
For Råde kommune
Vista-
rapport
2015/08 Vista Analyse has in cooperation with DAMVAD conducted a study in order to locate bottlenecks for development in the region. The analysis is part of Moss regions participation in KMDs development program for city regions.
- 2014 Green jobs: Kindergartens in Leksvik**
For Klima- og miljødepartementet
Vista-
rapport
2014/48 This rapport consists of a mapping and training program connected to realizing green jobs in the municipality sector. The rapport is part of a pilot project and should be viewed as a first step in working on developing methods and approaches for promoting and integrating environmental concerns in kindergartens.
Oscar contributed with data analysis and presentation.
- 2014 The value of urban ecosystem services: Four examples from Oslo**
Financed by the EU-project OpenNESS, Framtidens Byer and Oslo Kommune
Vista-
rapport
2014/46 Ecosystem services is a relatively new concept, especially in an urban context. This report presents four location specific examples of ecosystem services in Oslo and estimates the economic value of these. We hope this can contribute in raising awareness and contribute to these values being integrated in decision-making.
Oscar has contributed with research, collecting data and doing statistical analysis. This included a property price study and survey.
- 2014 Cost-benefit analysis of increased recreational snowmobile use**
For Den Norske Turistforening
Vista-
rapport
2014/44 This report aims at giving the best possible quantitative information basis of the effect of a suggested change in the law regarding snowmobile use.
Oscar has contributed with some of the data analysis.
- 2014 What is the social benefit of successful follow up of prisoners in Norwegian jails?**
For Røde Kors and Nettverk etter soning
Vista-
rapport
2014/38 The purpose of this report is to illustrate the potential benefit of follow up. Identifying average costs connected to crime and drug abuse. Give an estimate of saved resources of returning to regular jobs. Give an estimate of saved resources of ending drug abuse and crime but still receiving social services.
Oscar was in charge of the data analysis.
- 2014 Business effects of Miljøavtalen om NOx**
For Næringslivets NOx-fond
Vista-
Vista Analyse will document the effects of miljøavtalen for the relevant businesses

- rapport* 2014/36 in terms of increased competitiveness and development and implementation of environmental technology.
Oscar contributed with analysis of accounts of relevant businesses.
- 2014 NHOs Kommune NM 2014**
Vista-rapport 2014/28 This report presents the main findings and documents this year's Municipality championship. This championship ranks the Norwegian municipalities and regions in terms of 19 indicators reflecting the region's growth potential and attractiveness for business. The indicators are chosen in cooperation with NHO. All indicators are interactively available on NHOs website.
Oscar has contributed with data work.
- 2014 Experiences and challenges with climate- and energy planning in municipalities**
Vista-rapport 2014/23 *For Miljøverndirektoratet*
Vista Analyse has mapped the experiences and challenges with climate- and energy planning in accordance with national planning standards in municipalities. The mapping consists of a study of 205 climate- and energy plans, and a survey of the people in charge of these plans. A statistical analysis of the collected data material. The goal of the analysis is to identify systematic differences in the content and form between municipalities. There was also conducted in depth interviews with key agents.
Oscars has contributed in collecting and analyzing data.
- 2014 Spatial need of businesses**
In house analysis tool
Oscar has contributed in developing and maintaining a tool for analyzing information about business, jobs and spatial sprawl
- 2013-2014 Planning for Cost-Effective Environmental Risk Reduction in China**
For the Ministry of Environmental Protection in P.R. China and the Royal Norwegian Embassy in Beijing
The project Planning for Cost-Effective Environmental Risk Reduction in China is a major environmental cooperation project carried out by Vista Analysis, Chinese Academy for Environmental Planning (CAEP) and the Norwegian climate research center CICERO on behalf of the Chinese Government.
Oscar's role has been writing about policies for balancing environmental protection and economic development. Specifically, about building eco-industry parks, studying experiences from the eco-industrial park in Kalundborg, Denmark.
- 2013 Merchandise statistics**
In house analysis tool
Oscar has contributed in developing and maintaining a tool for analyzing merchandise statistics.
- 2012 Economic cost of domestic violence**
Vista-rapport 2012/41 *For Justisdepartementet*
Vista Analysis has estimated the economic cost of domestic violence. We estimate the economic cost of domestic violence to be around 4,5-6 billion Norwegian kroners in 2010. The largest loss to society comes from victims working less as a

consequence of domestic violence. Public expenditures in 2010 from police, courts, healthcare and social support was about 2-2,4 billion NOK. Expenses to social services for children is the largest share.

Oscar has contributed with research, interviews and cost estimation.

2012 Government transfers to Vestfoldsamfunnet

Vista- For Vestfold fylkeskommune

rapport Vista Analyse has mapped the government transfers to Vestfoldsamfunnet. In
2012/14 addition to the mapping, we have analyzed what criteria and considerations form
the basis of the transfers. The project was done in cooperation with DAMVAD
Norge.

Oscar has contributed with research and data analysis.
